APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion of the waters of an underground source as heretofore granted under Permit 60744 is issued subject to the terms and conditions imposed in said Permit 60744 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

A report shall be submitted to the State Engineer at the end of May of each year indicating the amount pumped from each well and the amount used from Daggett Creek for snow making purposes.

The total combined duty of water under Permits 60744, 60746, 60747 and Temporary Permit 71208-T shall not exceed 1327.12 acre-feet annually of which 1061.7 acre-feet is non-consumptive.

The issuance of this temporary permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on **April 15, 2005** at which time all rights herein granted shall revert to the right being changed by this temporary permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.467 cubic feet per second, **but not to exceed 142.67 acre-feet seasonally.**

Work must be prosecuted with reasonable diligence and be completed on or before:

Proof of completion of work shall be filed on or before:

Water must be placed to beneficial use on or before:

Proof of the application of water to beneficial use shall be filed on or before:

Map in support of proof of beneficial use shall be filed on or before:

ATTACHMENT TO TEMPORARY APPLICATION TO CHANGE THE POINT OF
DIVERSION OF PERMIT 60744 FOR UNITED STATES OF AMERICA, UNITED STATES
DEPARTMENT OF AGRICULTURE, FOREST SERVICE

ITEM 15 - REMARKS.

Permit 70330-T was requested last fall to drill a test well in search of a new source to increase groundwater production capability. Once a driller who could drill a deep test hole was engaged, it was late in the season. Unfortunately, he was not able to get the drill rig up the access road to the wellsite and Heavenly was not able to get another driller before weather prevented access for the winter. This application is being filed to allow for drilling of the well during the construction season in 2004. Please use map on file under Application 60743 to support the Existing Point of Diversion and Place of Use.
